

Keep up-to-date on new payment types – and use your resources elsewhere

EG Payment Advantages:

- A single package updated regularly with new payment types
- Integrates with most market-leading POS terminals
- Keep tills running even if your validation gateway is down
- A low, predictable monthly payment with no surprises
- Use your budget and resources for something else
- Reliable, competent support and quick response time.

EG Payment makes sure your tills are always ready to accept the latest forms of payment, without implementation hassles

MobilePay, Apple Pay, Google Wallet, Vipps, Klarna – every few months seems to bring a new form of payment. And you want your tills to be able to accept them all. But who has the budget and resources for endless rounds of implementations and updates?

EG Payment can help. For an easy monthly fee, EG Payment provides a single package that will allow your tills to accept the most requested new payment methods in Scandinavia. Just implement once and EG will provide regular updates to ensure that your payment solution is always current and supporting your business.

Why dedicate resources to keeping up to date on emerging payment trends and implementing new payment types when EG Payments can handle it all?

Keep your tills running, even when your validation gateway is offline

As a tried and tested solution that offers stable and robust operation, EG Payment can keep customers moving even when your validation gateway is offline by creating a buffer of transactions that can keep the tills running until normal service is restored.

Supports the most common payment and transaction types

EG Payment supports the most common payment types - including mobile and contactless card payments - and common transaction types such as: purchases, refunds, cancellations, authorizations and gift cards. It also integrates with Storebox, for use with MobilePay.

Your choice of hardware - works with most POS terminals

EG Payment works with the most frequently used and market-leading POS terminals, so there's no need to invest in new hardware unless you want to. And the list of compatible solutions is being updated regularly as new options emerge.

Competent, reliable service and support

When it's time for service and support, you can count on EG. Our dedicated retail team is known for its expertise and quick response time. It's all part of EG's end-to-end retail solution, which includes back-end Retail Management solutions, in-store administration and operations, POS and other hardware solutions, and competent business consulting services.
